

Dear Sirs,

Full Works FM initially carried out some major refurbishment works for us, due to a faulty water pipe, after our previous contractor let us down.

Since then, they have been heavily involved with a number of projects, including but not limited to –

- Space planning / management
- M&E PPM scheduled maintenance
- Consumable supplies (providing significant costs savings)
- Agile working assessments
- Major and minor fit out works

Paul and his team are extremely dedicated, and are always happy to go that extra mile to ensure a seamless delivery in all of aspects of works provided.

We have worked with them since early 2013, and could not be happier, or more impressed with the levels of service that they continue to provide.

I can highly recommend using Full Works FM, for any needs you may have.

Yours sincerely,

Mark Smith
